### AQUACULTURE AND HYDROPONICS: 1968-1978

BIBLIOGRAPHIES AND LITERATURE OF AGRICULTURE, BLA-2, MAY 1979 This is the second bibliography in a new series, Bibliographies and Literature of Agriculture published by the Technical Information Systems, Science and Education Administration (SEA), U.S. Department of Agriculture. Four U.S. Department of Agriculture agencies — Agricultural Research Service (ARS), Cooperative State Research Service (CSRS), Extension Service (ES), and the National Agricultural Library (NAL) — have been merged to form a new organization, the Science and Education Administration (SEA), U.S. Department of Agriculture. The five regional series of ARS, the CSRS series, and ES Circular, and the NAL Library List have been discontinued. If you subscribed to any of these discontinued series, you will continue to receive similar material from SEA as new series are established. Subscribers wishing to modify or stop mailings coming to them, should write the office whose name appears below. Please include the mailing label from this publication with your request.

#### PREFACE

Citations for this bibliography were pulled from the AGRICOLA citation database online. They represent:

- Articles, monographs, and series, regardless of language, indexed at the National Agricultural Library since the publication of the January 1970 issues of the Bibliography of Agriculture and the National Agricultural Library Catalog.
- Literature received more than one year after publication is generally not indexed; exceptions are made for important scientific publications.

Some duplication of citations occurs because the system requires separate entries for each of the separate files which are incorporated into AGRICO The compiler has attempted purging of known duplicate entries.

The bibliography is a broad subject arrangement by categories as used in The Bibliography of Agriculture; subarrangement is alphabetical by author A personal author index is included.

User comments and suggestions are welcomed and should be forwarded to the compiler, Charles N. Bebee.

Citations listed on pages 58 - 65 are items from old category codes 1970-1971. These cannot be sorted online and are, therefore, arranged in sing alphabetical order.

#### AVAILABILITY OF REFERENCES CITED

The National Agricultural Library (NAL) offers two document delivery services to libraries, information centers, commercial organizations and individuals:

#### I. INTERLIBRARY LOAN SERVICE

NAL will loan monographs from its collection to any library in the United States. Individuals should request publications through their local public, school or special library. Excluded from loan are serials (except USDA serials), books in special collections such as Rare Books and Reference, and proceedings of meetings and conferences. Xerographic copy of microfilm will be supplied from non-circulating material at the expense of the borrowing library, when that library so indicates on the ALA Interlibrary Loan form (see RATES under PHOTODUPLICATION SERVICE below).

- 1. <u>Form:</u> The American Library Association's (ALA) Interlibrary Loan Request form is preferred. Citations should be as complete as possible and the source of reference should be provided if known. Please use one form for each item requested. TWX requests are accepted. NAL's number is 710-828-0506.
- 2. Loan Period and Renewals: Material is loaned for 30 days from the date it is charged at NAL. Renewals should be requested by phone (301--344-3761).
- 3. <u>Delivery and Returns</u>: All loans will be sent first class and should be returned in the same manner. The borrowing library is responsible from the moment of dispatch for any loss or damage incurred.

#### II. PHOTODUPLICATION SERVICE

Reproductions of journal articles, technical papers, reports, etc. in the NAL collection may be purchased as outlined below:

- 1. Form: Please use USDA Request for Photocopying forms (LF-607). These forms are available from NAL upon request. Use one for each citation. Requests should be as complete as possible with a minimum of abbreviation. Indicate whether xerographic copy or microfilm is desired and sign each order form. If an alternate form is used, please send in triplicate.
- 2. Rate: (Subject to increase)

Xerographic Copy: \$2.00 for each 10 pages or fraction copied from a single article or bo Microfilm (35mm): \$1.00 for each 30 pages or fraction copied from a single article or bo

- 3. Payment: Users with heavy or continuous volume may request monthly billing or pay for requests with NAL coupons. These coupons may be purchased in any quantity at \$1.00 each. Payment (check or money order payable to the National Agricultural Library) must accompany NAL coupon orders. Attach the necessary number of coupons to each LF--607 submitted. Occasional or one time users should enclose a check or money order with each request or group of requests.
- 4. Restrictions: Reproductions will be made only from material in the NAL collection.

  Monographs will not be copied in their entirety (see Interlibrary Loan Service above).

  Special arrangements must be made for microfilm of entire issues or long runs of a journal title.

Requests for the services described above should be sent to: U.S. Department of Agriculture, National Agricultural Library, Lending Branch, Beltsville, Maryland 20705. Questions concerning these services should be directed to the attention of the Chief, Lending Branch.

NOTE: USDA EMPLOYEES RECEIVE FREE SERVICE AND SHOULD NOT SUBMIT REQUESTS ON THE FORMS DESCRIBED ABOVE
